Documentation and Testing Guidelines for Capital Placement Onboarding API

Version	1.0.0
Created	14-05-2024
Prepared by	Faith Olusegun

Table of Contents

1.0 Introduction

This is the first version of the Capital Placement Onboarding API. It is developed to be leveraged by the frontend team for the purpose of exposing job candidate onboarding functionality to clients. This document provides a usage and testing guide for all APIs in this collection. Sample requests and responses have been provided for each API and each endpoints. It is important to also note that all endpoints return either of HTTP 200 OK, HTTP 400 BadRequest, HTTP 404 NotFound, and HTTP 204 No Content. In summary the purpose of this API is to give employers ability to configure job application forms as easy as possible.

2.0 APIs

Below are the APIs and attached to this document is a postman collection api.json file that can be used to import it into postman.
Environment variables:
{{baseUrl}}: This depends on the environment where you are running the code.
swaggerURL: https://{{baseUrl}}/swagger/index.html
content-type: application/json

2.1 Employer

This is the Employer API. It was misspelled as 'Employeer.'
2.1.1 GetQuestionTypes

This gets all the possible question types. Find the request and response examples below.

Request:

URL:	https://{{baseUrl}}/api/employeer/templates/questionTypes
Method:	GET
Authorization:	NONE

Response Example:

Name:	SUCCESS
URL:	https://{{baseUrl}}/api/employeer/templates/questionTypes
Method:	GET
Authorization:	NONE
Status Code:	200 OK
Response Body:	

```
[
   "paragraph",
   "yesorno",
   "dropdown",
   "date",
   "number"
]
```

2.1.2 CreateTemplate

This endpoint does the main work of creating templates. Use this endpoint to create a new job application template as an employer. Find the request and responses below.

Request:

URL:	https://{{baseUrl}}/api/employeer/templates
Method:	POST
Authorization:	NONE

Request Body	{
	    "isInternal": true,
	    "isVisible": true,
	    "title": "This is my first application template as EmployerA007",
	    "description": "This is a brief description of this job... A fast-growing fortune 500 company needs a highly-skilled software developer in the Moscow team. We are looking for someone skilled in C#, JAVA, Rust programming, an avid open-source contributor and someone who has worked extensively in enterprise software solutions development and have written parsers and compilers before. Also, his name must be Faith Olusegun",

```

2.1.3 GetAllTemplates

This endpoint retrieves all application templates in the database. Find the request and response example below.

URL:	https://{{baseUrl}}/api/Employeer/templates
Method:	GET
Authorization:	NONE

Response Example:

Name:	SUCCESS
URL:	https://{{baseUrl}}/api/Employeer/templates
Method:	GET
Authorization:	NONE
Status Code:	200 OK
Response Body:	

```
[
  {
    "id": "0cafa232-1a76-4860-a1e4-68f43fb6b947",
